ABOUT UNICASA

Dell Anno

Located in Bento Gonçalves, in Serra Gaúcha, Unicasa has been operating in the furniture market for almost 40 years.

Its factory facility is larger than 50,000 m² and has a state-of-the-art machinery that combines robotized technology and large production lines.

Our industry was a partnership initiative of two traditional families from Serra Gaúcha: businessmen Alexandre Grendene and Juvenil Zietolie were the founders.

In 2012, the company achieved the distinction of being the first in the sector to go open capital on B3, reaching the highest level of corporate governance, known for its rigorous requirements.

INTERNATIONAL DESIGN

HIGH TECHNOLOGY

QUALITY AND SUSTAINABILITY

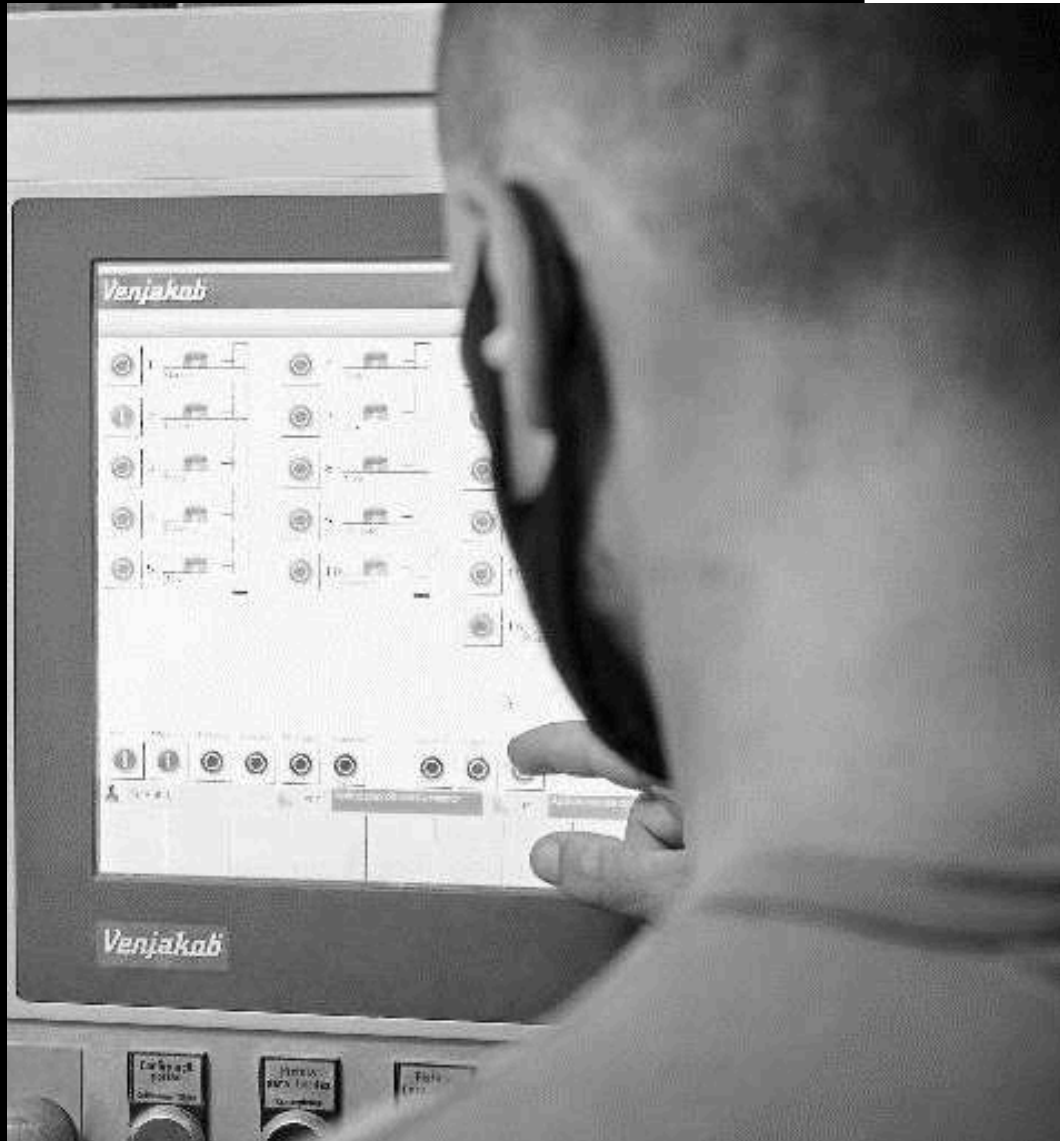

INTERNATIONAL DESIGN

Design combined with functional rhythms and conviviality. A search for formats that represent contemporary lifestyles and express comfort, dynamism and freedom of movement.

A Brazilian industry in constant search of elements that globalize the brand.

HIGH TECHNOLOGY

The plant has a fully robotic painting system and an automatic just-in-time system that further customizes to the individual needs of the consumer.

QUALITY AND SUSTAINABILITY

Thinking about caring for our planet, Unicasa adopts sustainable practices throughout the factory's production process, such as:

- the purchase of reforested wood;
- rainwater harvesting;
- waste recycling;
- effluent treatment;
- replacing diesel oil with LPG;
- use of translucent roof tiles to reduce energy consumption during the day;
- use of recycled plastic in 100% of its products.

PRESENCE IN MORE THAN 10 COUNTRIES

With more than three decades of experience in the furniture sector, Unicasa has a history of success in more than 10 countries, with a portfolio of brands that meets the needs of customers in search of a sophisticated and functional life in various countries around the world.

Brazil | Canada | United States | Dominican Republic | Colombia
Paraguay | Uruguay | Venezuela | Puerto Rico | Bolivia | Mexico | Costa Rica

SPECIAL FINISHES

Dell Anno

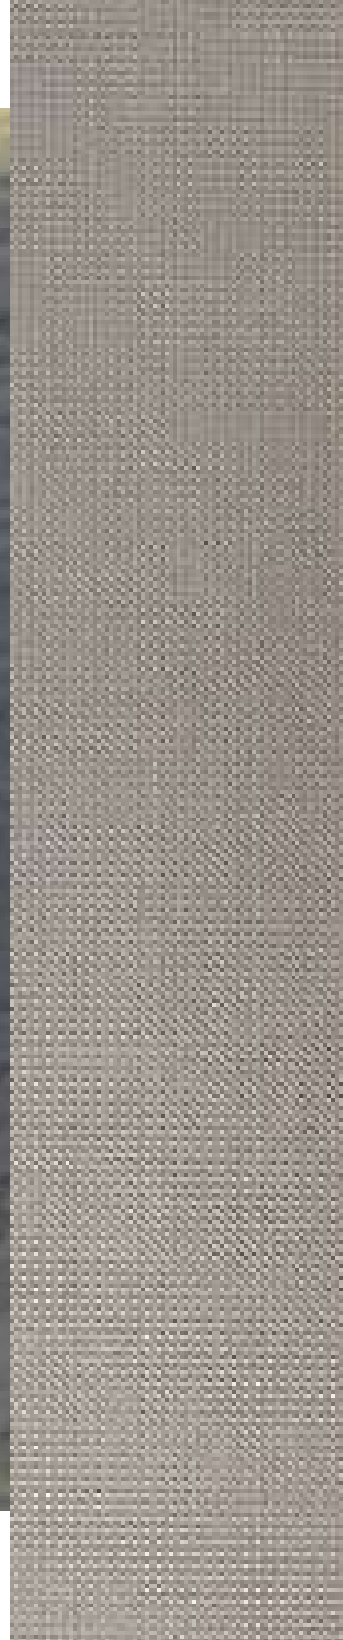

Cotelê

The softness of Lacca Cotelê invites you directly to touch it, inspired by the delicate stripes of Portuguese and British royal velvet and graphics. Its contribution is an unusual visual effect on the walls, which could be mistaken for fabric.

A new home.

Dell Anno

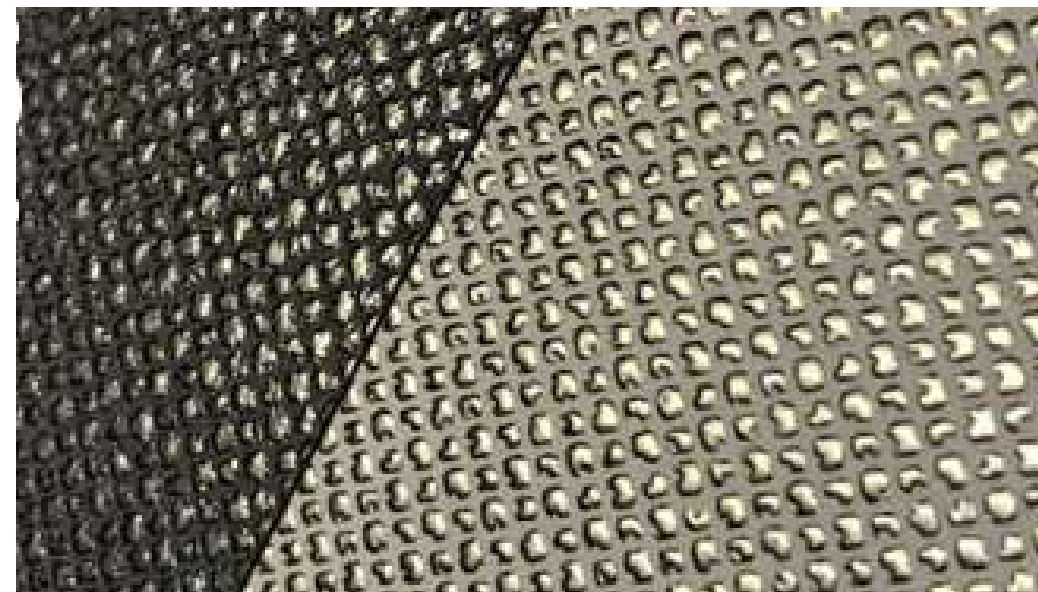

Porcelain

An industrialized porcelain material of Italian origin with a textured surface, imported by Dell Anno;

One of the most sophisticated materials in the collection, bringing a unique touch to the composition of ambiances;

Porcelain is non-porous, which is very important nowadays, as it doesn't accumulate dirt and is easy to clean.

MIMESIS COLLECTION

Évora is one of Portugal's jewels, located in the Alentejo region, full of architectural and cultural masterpieces. It is a museum city, surrounded by a wall, which was declared a UNESCO World Heritage Site in 1986. Everywhere you go you'll find the iconic Portuguese tiles and large clusters of whitewashed houses, in keeping with Siza's minimalist aesthetic.

Évora Mimesis

Despite his international presence, it is in and around Porto that Siza Vieira's major architectural works are concentrated. Among the architect's projects in the city are the Faculty of Architecture of the University of Porto, the Serralves Museum of Contemporary Art and the Bairro da Bouça. All feature the artist's minimalist aesthetic in the use of white concrete.

Porto Mimesis

RAW MATERIAL

Dell Anno

MDF

- Made from reforested wood and fibers. The sheet has a more compact and uniform structure.
- Its formulation uses a urea-based resin to bind the fibers together to form the panel.
- Ideal for painted and machined parts and those with embossed finishes, due to its uniform surface.

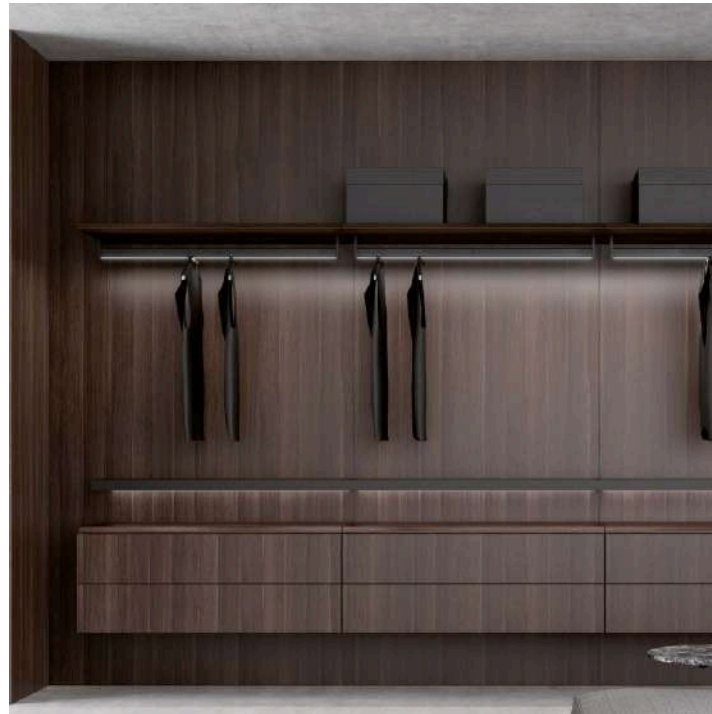

MDP

- Panels made from selected reforested wood particles.
- The particles are interwoven with special resins through pressure and heat, guaranteeing resistance to warping.
- MDP is highly recommended for modular structural parts such as sides, bases, shelves, doors and tops.

LEGRABOX DRAWER

- Elegance in motion. The box system captivates with its clean alignment and unpretentious side design.
- The thin 12.8 mm straight side walls blend harmoniously into each piece of furniture.
- When opening, this ease of movement can be felt from the first millimeter.
- High fronts are becoming increasingly important as a compositional element.
- Legrabox drawers have the brand name printed on the side, bringing exclusivity and sophistication to the product

STAINLESS STEEL

DOVETAIL DRAWER

-Resistance: The drawer construction is known for its resistance to separation, especially in directions perpendicular to the joint, making it ideal for drawers that bear weight or are opened and closed frequently.

-Aesthetics: In addition to functionality, they are valued for their appearance, with the mounting visible on the sides of the drawer, which can add handcrafted value to the piece of furniture.

-Durability: Due to the firmness, this type of construction increases the durability of the drawer, maintaining its structural integrity over time.

-Traditional: This is a traditional joinery technique, widely used in high-quality furniture.
